## Legend

The following legends are used throughout this manual:

AFR.....Air Flow Rate	MBh.....BTUH x 1000
BPF.....By-pass Factor	Ph.....Phase
C.Cap....Cooling Capacity	Pa.....Pascal
CFM..... Cubic feet per minute	PD.....Pressure Drop
EER.....Energy Efficiency Ratio	PI.....Compressor Power Input in kW
Hz.....Hertz	RPM.....Revolutions per Minute
in.wg.....inches of water gauge	RPS.....Rated Power Supply
kW.....Kilowatt	TR.....Tons of refrigeration = 12 MBh
Kg.....Kilogram	V.....Volts
lbs.....Pounds weight (British units)	FPI.....Fins per Inch
L/s.....Liters per second	ESP...External Static Pressure

## Nomenclature

 **SKM reserves the right to change, in part or in whole the specifications of its Air Conditioning Equipment at any time in order to add the latest technology. Therefore, the enclosed information may change without any prior notice.**

## Introduction

SKM **APMR** Series Packaged Air Conditioners are designed and manufactured to meet the requirements of the Gulfs severe climatic conditions and are built specifically for outdoor installations, either on ground or roof level.

The **APMR** Series Packaged Air Conditioners are ideal for warehouses, large halls, schools, mosques, or wherever the requirement is for a heavy duty unit with a hermetic compressor.

**APMR** Series Air-cooled Packaged Air Conditioners (hermetic scroll) are available in 15 models covering nominal capacity ranges from 5 TR – 46TR (17 kW to 172 kW) in 50Hz.

**APMR** units are designed to operate in a wide ambient temperature range from 50°F(10°C) to 125.6°F (52°C) and even lower if an optional head pressure control system is provided . above 120°F, please consult SKM.

**APMR** units are designed and rated in accordance with AHRI-210/240 and AHRI-340/360 standards.

**APMR** Series will come in two tiers, Standard models which have competitive pricing and Hi-Efficiency models which will meet high EERs and exceed ESMA requirements.

**APMR** Series Packaged Air Conditioners are completely assembled, internally wired, charged with R-410A refrigerant at factory, tested before despatch and ready for installation. All that is required on site is connecting ducting and power supply. This greatly reduces installation work and costs. They are designed for ducted systems which will enable them to be installed on roof tops or on the ground.

SKM provides qualified service and stocks of replacement parts in all major cities of the G.C.C. countries, Egypt, Jordan, and Pakistan. See back cover for details or call SKM.

S.K.M Air Conditioning LLC

*You name it.....We cool it*

## General Features

The **APMR** Series Packaged Air Conditioners is yet another unique series from SKM incorporating a high efficiency cooling coil, heavy duty evaporator blower and motor resulting in an extremely rugged, long-life, energy efficient, self-contained unit that will provide cooling at higher efficiency over a long and extended life. Compared to the traditional units available in the market, the **APMR** series Packaged Units are very low on energy consumption.

The flexibility of the **APMR** series is ideal for consideration on special applications including:

- 100% fresh air units or units with high incidence of outdoor fresh air.
- Units with unusual filtration requirements incorporating carbon, bag and/or other filters.
- Special units for ducted condenser air using centrifugal type condenser air fans.
- Units constructed of aluminium or stainless steel.
- For those special off-shore or refinery or sewage treatment applications requiring specially coated heat transfer coils.

All of these flexibilities cannot be cataloged nor all the possible options listed. They are available and SKM has over 40 years of experience in designing and building such units to meet the most stringent requirements of most applications. For your special requirements please consult SKM.

## Component Features

The common standard features of all **APMR** series Packaged Units include the following.

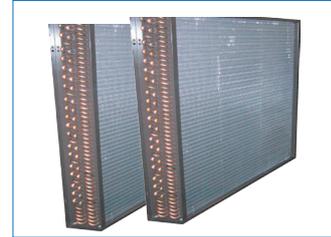

### Compressor

Compressors used in **APMR** packaged unit series are hermetically sealed, compact scroll with the following features:

- High Efficiency.
- Quiet operation, Low Sound levels.
- Compact and light .
- Limited wear.
- 70% fewer moving parts than comparably sized reciprocating compressors
- Unique ability to handle liquid refrigerant.
- Suction gas motor cooling.
- Centrifugal oil pumps.
- Brazed fittings or Rotalock as options.
- Two refrigerant circuits on larger units provides efficient part load.

## Condenser

Condenser coils are manufactured of seamless copper tubes mechanically bonded to aluminum fins to ensure optimum heat transfer.

Condenser Coil

All coils are tested against leakage by air pressure of 715psig (4930kPa) under water.. All coils are 1, 2, 3 or 4 rows, with 14FPI (1.8mm) or 16FPI (1.6mm), 3/8”(9.5mm) O.D. tubes. An integral subcooling circuit is provided to increase the cooling capacity, without additional operating cost.

For different application requirements, other optional condenser fin materials are available:

- Copper fins.
- Electroplated Copper Fins.
- Copper finned coils with electro-tinned after manufacturing.
- Precoated Aluminum fins  
The pre-coated is hydrophobic polyurethane resin. This option provides substantial corrosion protection beyond standard coil construction.
- Aeris Guard Coil Coating  
The Aeris Guard Coil is a self etching high performance modified epoxy finish that is specifically designed to coat and protect Aluminum and Copper surfaces. In addition, the coating is ideal for the protection of ferrous and non ferrous materials.

All models are suitable for Gulf countries, ensuring the condenser coil design shall provide long life operation with the least possibility operational blockage on the condenser. Ample condenser surface and sensible air flow across the condenser ensures a low temperature differential between condensing temperature and the high Gulf ambient making the **APMR** packaged unit perform efficiently and durably.

## Condenser Fans

The condenser fans are propeller type, aluminium alloy blades, directly driven by electric motors.

Motors are Totally Enclosed Air Over (TEAO) four pole or six pole with class 'F' insulation and minimum IP54 / IP55 protection depending on models.

The TEAO and class 'F' Insulation features ensure long life and are unique to SKM. The motors are factory wired using wires specially selected for high ambient operation, to unit control panel where the motor contactors are located to control the operation of these motors.

The condenser fans are individually statically and dynamically balanced at the factory Complete fan assembly is provided with Suitable acrylic coated fan guard.

## Evaporator

Evaporator coils are manufactured of seamless copper tubes mechanically bonded to aluminium fins to ensure optimum heat transfer. All evaporator coils are tested against leakage by air pressure of 450psig(3103kPa) under water. The DX evaporator coils are complete with headers of seamless copper tubing. Supply headers incorporate a correctly sized distributor. For different application requirements, other evaporator coil material and/or treatment are available on request.

- Copper fins.
  - Electro-tinned Copper fins.
  - Copper finned coils with electro-tinned after manufacturing.
  - Precoated Aluminum fins.
- The pre-coated is hydrophobic polyurethane resin. This option provides substantial corrosion protection beyond standard coil construction.
- Aeris Guard Coil Coating.
- The Aeris Guard Coil is a self etching high performance modified epoxy finish that is specifically designed to coat and protect Aluminum and Copper surfaces. In addition, the coating is ideal for the protection of ferrous and non ferrous materials.

Evaporator coils are rated in accordance with AHRI-410. Evaporator coil supplied with suitable size thermostatic expansion valve(s) and multi-circuited distributors providing capacity modulation to match the compressors. The cross wave fins and staggered tubes design uses the evaporator surface effectively by creating uniform air turbulence and optimum heat transfer over the entire finned surface. Requirements for higher face velocities can be handled by use of moisture eliminators to avoid carryover.

## Evaporator Fan & Drive

Standard evaporator fan is forward curved centrifugal DIDW, statically and dynamically balanced complete with shaft, self-aligning, lubricated for life ball bearings.

**APMR** series have single and dual fans mounted on a single heavy duty shaft. The fan(s) are driven by single speed electric motor. The electric motors are foot mounted, 4 pole, totally enclosed fan cooled (TEFC), IP-55 protected, and with Class F insulation. The motor is fitted with an adjustable V-belt drive, as standard. Shaft ends insert into oversized, tapered lock self-aligning, long-life bearings. Motor is factory wired to the control panel where the motor contactor is located.

## Filter Section

**APMR** series can be with a range of filter sections and filters to meet requirements for the most demanding applications.

- Flat or vee filter sections to accommodate 1" or 2" cleanable aluminium media filters can be provided.
- A bag filter section to house 15", 21" or 30" deep bag filters having efficiencies as desired can also be provided, as required. Filter sections come with latches to provide easy access for removal and for maintenance.
- On 100% fresh air applications an initial sand trap louvre can effectively minimize entrance of sand into the air stream.

- High efficiency mini pleat panel filters are available as an alternative for bag filter where space is limited.

**To order a sand trap louvre from SKM specify fresh air opening size with option ASL.**

## Casing/Structure

The unit casing used in **APMR** Packaged units is made of zinc coated galvanized steel sheets conforming to JIS-G 3302 and ASTM A653 which is phosphatized before application of an electrostatic powder coat of approximately 60 microns and then oven-baked for a tough and lasting weather resistant finish. This finish and coating can pass a 1000 hour in 5 % salt spray testing at 95°F (35°C) and 95% relative humidity as per ASTM B117. The entire casing panels are designed to be leak proof against rain and ensure rain water cannot enter the packaged air conditioner interior.

The evaporator section is sealed with vinyl gaskets.

The standard evaporator section is insulated from all sides with black-neoprene faced heavy density 1" thick fiber glass insulation.

The insulation-cum-sound liner meets the fire requirements of NFPA90A & 90B and is secured with mechanical fasteners in addition to water resistant adhesive.

For applications requiring an inner skin in the evaporator section, option DSE provides an 0.7mm galvanized inner skin. Suitable isolation to ensure no cold-bridges and no condensation on the exterior of the units is provided. The condensate drain pan is heavily insulated to ensure condensation does not occur. Stainless steel condensate drain pans are available on request.

## Electrical Control Panel

The **APMR** packaged Air Conditioners are provided with IP-54 control panel enclosure comprising all starting, operating and safety controls. The panel is factory wired in accordance with NEC 430 & 440, labelled, tagged and features 220V / 240V controls.

- All compressors are with DOL starting.
- Individual compressor, condenser fan motors and evaporator fan motor contactors.
- Motor protector circuit breaker for condenser and evaporator fan motors.
- Voltage monitoring module for protection against under voltage, over voltage, phase loss, phase reversal and phase unbalance of the incoming voltage.
- Control circuit breaker.
- Control circuit on/off switch.
- Electronic control board for unit operation.
- Diagnostic LED's on the control board for easy troubleshooting.
- Power and control circuit terminal blocks.
- Compressor short cycling protection.
- High pressure protection.
- Low pressure protection.

## Optional Features

**APMR** series heavy duty packaged air- conditioners are available with a multitude of optional features which makes design and selection extremely easy and capable of matching the most stringent of requirements.

### Alternative Condenser Material

Made of copper tubes and alternative fin material and/or protective coating.

- For Copper Fins, specify **(FC)**.
- For Electrotinned Copper Fins only, specify **(CFT)**.
- For Copper Finned Coils electroplated post manufacturing, specify **(FCT)**.
- For Pre-Coated aluminum fins, specify **(FAP)**.
- For Aluminum Fins with Aeris post Coat Protection, specify **(FAA)**.
- For Copper Fins with Aeris post Coat Protection, specify **(FCA)**.

### Alternative Evaporator Material

Made of copper tubes and alternative fin material and/or protective coating.

- For Copper Fins, specify **(EFC)**.
- For Electrotinned Copper Fins only, specify **(ECFT)**.
- For Copper Finned Coils electroplated post manufacturing, specify **(EFC)**.
- For Pre-Coated aluminum fins, specify **(EFAP)**.
- For Aluminum Fins with Aeris post Coat Protection, specify **(EFAA)**.
- For Copper Fins with Aeris post Coat Protection, specify **(EFCA)**.

### Condenser Coil Guard **(CGP)**

Wire mesh guard, in painted finish for condensers coils. Recommended on ground level installation where coil needs to be protected against vandalism.

### Double Skin Evaporator **(DSE)**

Inner skin of 0.7 mm galvanized sheet in the evaporator section provided with no cold bridges. Recommended for 100% fresh air applications.

### Marine Paint **(MP)**

To provide increased corrosion resistance on coastal environments and offshore location.

### Filter Section

**APMR** series can be with a range of filter sections and filters to meet requirements for the most demanding applications.

S.No	Filter Type	Option code
		APMR 51005 to APMR 52046
Flat Filter Section with Media		
1	1" (25 mm) / 2" (50 mm) Thick Washable Aluminum.G2/G3	[FSIP1]/[FSIP2]
2	1" (25 mm) / 2" (50 mm) Thick Synthetic.G4	[FSIS2]
Vee Filter Section with Media		
3	1" (25 mm) / 2" (50 mm) Thick Washable Aluminum.G2/G3	[FVSP1]/[FVSP2]
4	1" (25 mm) / 2" (50 mm) Thick Synthetic.G4	[FVSS2]
Bag Filter Section with Media*		
5	15" (380 mm) deep bag filter	FSBG0-F8
6	21" (534 mm) deep bag filter	FSBG1-F8
7	30" (762 mm) deep bag filter	FSBG2-F8
Pleated Filter Media*		
8	4" (100 mm) thick	FSMP4-F8

\*F8 indicates the efficiency, For F9 change option code.

Table 1

- Flat or vee filter sections to accommodate 1" or 2" cleanable aluminium media filters can be provided.
- A bag filter section to house 15", 21" or 30" deep bag filters having efficiencies as desired can also be provided, as required. Filter sections come with latches to provide easy access for removal and for maintenance.
- On 100% fresh air applications, an initial sand trap louvre can effectively minimize entrance of sand into the air stream, sand trap louvre (ASL) is available on request.
- High efficiency mini pleat panel filters are available as an alternative for bag filter where space is limited.

### HEPA filters **(FIHP)**

Ultra high Absolute HEPA (High Efficiency Particulate Air filter with efficiency in excess of 99% when measured by using DOP (Di-Octyle Phthalate) method. In accordance with EN1882 standards. Eff : H13 (including section)

### Sand trap louver **(ASL)**

To extract coarse sand prior to the entry in the unit.

### Galvanized Frame And Base **(GFB)**

Steel frame and base which are hot dip galvanized after manufacturing process. This is recommended for highly corrosive environments.

### Pressure Gauges **(SDG1)**

Suction and discharge indication of each refrigerant circuit. Gauges mounted outside the Control Panel.

### Pressure Relief Valve **(PRV)**

To protect the unit from being over-pressurized.

### Stainless Steel Drain Pan **(SSP)**

Heavy gauge 316 stainless steel drain pan under the entire cooling coil and moisture eliminator. Insulation under drain pan as per SKM standard.

### Stainless steel drain pan (Grade 304) **(SDP)**

Stainless steel drain pan(Grade 304). Insulation under drain pan as per SKM standard.

### Extra Shut Off Valve(s) **(XFV)**

To fully isolate refrigerant filter drier, additional shut-off valve (s) can be incorporated in the liquid line.

### Rotalock Valves on compressors **(RVC)**

For additional facilitation of maintenance of unit.

### Condenser & Evaporator Fans with polyglycoat coating **(PGF)**

To provide protection against corrosion for evaporator or condenser fans.

## Anti Spark Fan & Belt (SPF)

For special applications like explosion proof units.

## Mixing Box (BMX)

With or without sand trap louvre and bird screen on fresh air side.

## Two inch insulation (2SG)

For evaporator section. Please contact SKM for this option

## \*Electric Heating (HTR1)

Electric heating batteries are made up of finned heating elements, constructed from high quality 80/20 nickel chrome resistance wire centred in metal tube by compressed magnesium oxide. Helical fins are tightly wound around the tubular heating element.

Heater batteries when ordered comes with stage contactors, primary auto reset thermal safety cut-out, secondary manual reset thermal safety cut-out and air flow switch. Power fuses / circuit breaker are provided for heaters with total ampere exceeding 48 amperes. For smaller heaters, power fuses can be provided if specified. Control of the heaters will be from the **APMR** control board.

Following are the optional kW ratings for electric heater. Ratings other than those specified here can be supplied on request. Consult SKM for details.

APMR	HEATER (kW)	STAGES
51005	4.5	1
51007		1
51008	9	1
51009		1
52010		
52013	18	
52015		
52019	24	
52022		
52025	36	2
52028		
52032		
52036	48	
52042		
52046		

Table 2

\*Applicable for standard and high-efficiency units, but without ESMA certification. Consult SKM for applicable models.

## Hot Gas Bypass System (GBP)

With solenoid to enable operation of a large sized unit at very low loads, during low load demand due to application requirements or where unit is selected to work on 100% fresh air applications.

## Electronic Expansion Valve (EEV)

To provide energy saving benefits over mechanical thermostatic expansion valve (TXV).

## Advanced Micro processor control system (AMCS)

An advanced microprocessor based controller can be provided as option, in case required. This controller will be with built-in display keypad and has many features. It comes with a loose supplied sleek and elegant design room thermostat for installing in the conditioned space.

## Low Ambient Operation Kit (LAO)

For unit operation down to lower than normal gulf ambient. Please specify during the time of order. Please consult SKM for details.

## IP 55 Control Panel (ICP)

Control Panel for special applications to meet IP55 requirements. Please consult SKM for details.

## Main Isolator (without door interlock) (ISO)

For main power isolation. (Consult SKM)

## Control Transformer (CXT)

This option is necessary and available for **APMR** models rated for 440V/3PH/50Hz or power supplies without neutral. When ordering for these voltages, this option must be ordered.

## Voltage Monitoring Module as per DEWA (DVM)

Under voltage relay as per DEWA regulations. This option is available for Dubai, UAE only.

## Circuit Breaker for Compressor (CBC)

For those electrical specification which requires additional short-circuit and overload protection for the compressors.

## External Overload Protection (EOP)

For those electrical specification which requires additional overload protection for the compressors.

## UL 1995\* (UL-LISTED)

Unit constructions are certified and in compliance to UL-1995 safety standard. Model designation, construction and wiring details are unique. Please consult SKM for availability of selected models.

## Soft Starter (SFS)

Compressors will be started using electronic solid state soft starters that will ramp up the speed of the compressors to rated speed within few seconds thus reducing the mechanical & electrical stresses. Please consult SKM for details.

## Pump Down Facility (PD)

The compressor will switch off each time with a Pump Down Cycle in order to prevent Liquid refrigerant migration to the compressor during off Cycle periods.

With this option, each circuit will be provided with an additional discharge check valve (if required) to prevent Refrigerant Migration from High side to Low side when the compressor is off.

### Note:

\* Not applicable for Hi-Efficiency units.

\*\* Whenever multiple options related to the unit control, please consult SKM for the drawings, as the size of the control panel might change.

## Options for Field Installations

### Anti-vibration mounts **(CAVM)**

Recommended for roof mounted units or other locations in the vicinity of occupied spaces, where noise may be objectionable.

### Hi-Lo Pressure Gauges **(CSDG1)**

Without piping or isolating pet cocks.

### Low Voltage Thermostat **(CHTS)**

(1 or 2 stages as per model) for wall mounting and for cooling/heating operation (not required with AMCS Option) .

Special custom built units incorporating specially required features like units for larger capacities , anti-condensation resistance heaters embedded in evaporator motors, can be manufactured on request. Consult SKM with detailed requirements.

**Contact SKM for all such applications or requirements.**

## Capacity Control Steps

The Standard Capacity Control Steps are shown below.

APMR	APMR Hi-Efficiency	Standard	Number of Steps
51005	51005G	100-0	1
51007	51007G	100-0	1
51008	51008G	100-0	1
51009	51009G	100-0	1
52010	52010G	100-50-0	2
52013	52013G	100-50-0	2
52015	52015G	100-50-0	2
52019	52019G	100-50-0	2
52022	52022G	100-50-0	2
52025	52025G	100-50-0	2
52028	52028G	100-50-0	2
52032	52032G	100-56-0	2
52036	52036G	100-50-0	2
52042	52042G	100-56-0	2
52046	52046G	100-50-0	2

Table 3

## Selection Procedure

**APMR** series packaged air-conditioners should be selected with care and using sound engineering judgement. Selections based on matching total capacity alone or air flow rate alone may not be correct. To meet requirements of a specific application, sample procedure for selection is given in examples below.

	Example 1: English Units	Example 2: SI Units
Application Requirements		
Required total cooling capacity.....	200 MBh.....	58.6 kW
Sensible cooling capacity.....	165 MBh.....	48.4 kW
Condenser entering air temp db.....	115°F.....	46.1°C
Evaporator entering air temp. db/wb.....	80/67°F.....	26.7/19.4°C
Evaporator air flow rate.....	8000 cfm.....	3775 l/s
External static pressure.....	1.00 inwg.....	250 Pa
Electric power supply.....	380V/3PH/50Hz.....	380V/3PH/50Hz
Refrigerant.....	R-410A.....	R-410A

Determine cooling capacity at design conditions.

### Selection Procedure :

Enter packaged unit capacity ratings at given condition and select unit size **APMR** - 52019 having total cooling capacity 207.9 MBh (60.9 kW), and sensible cooling 159 MBh (46.7 kW), PI =19.1 kW. Total sensible cooling capacities & power to be interpolated for untabulated data.

- For EDB other than 80°F (26.7°C), use following formula:

$$\text{Actual sensible capacity} = \text{Rated sensible capacity} + 0.0011 (1 - \text{BPF}) (\text{EDB} - 80) \times \text{cfm} - \text{IP Units}$$

$$\text{Actual sensible capacity} = \text{Rated sensible capacity} + 0.00123 (1 - \text{BPF}) (\text{EDB} - 26.7) \times \text{l/s} - \text{SI Units}$$

### Fan Speed & Motor Power

Refer to fan performance table on page 15-16 and adjust fan RPM = 853, fan brake power 2.49 kw. Standard motor size for selected model is 3 kW.

**SKM Computer Selections are available for quick, detailed and accurate selections.**

Table 4

- Notes :**
- (1) Capacity rating in accordance with AHRI standard 210/240 & 340 / 360.
  - (2) Capacity ratings based on evaporator entering air temperatures of 80/67 °F (26.7/19.4 °C) dry bulb/wet bulb and condenser entering air temperature of 115 °F (46 °C).
  - (3) Capacity is gross capacity which does not include the effect of evaporator fan motor heat.

Table 5

### Notes :

- 1) Capacity rating in accordance with AHRI standard 210/240 & 340/360.
- 2) Capacity ratings based on evaporator entering air temperatures of 80/67 °F (26.7/19.4 °C) dry bulb/wet bulb and condenser entering air temperature of 115 °F (46 °C).
- 3) Capacity is gross capacity which does not include the effect of evaporator fan motor heat.

## Field Connections

APMR series self-contained heavy duty air cooled packaged units are designed for minimum field interaction.

Power hook-ups and control wiring of room thermostat as per Electrical hook-up diagram is all that is required to electrically connect any model of APMR series .

Every APMR series package air conditioning unit requires, at most, field installed fused disconnect switches or circuit breakers, and room thermostat.

Refer below for a schematic representation of required field electrical hook-ups for a standard APMR series packaged air conditioning unit.

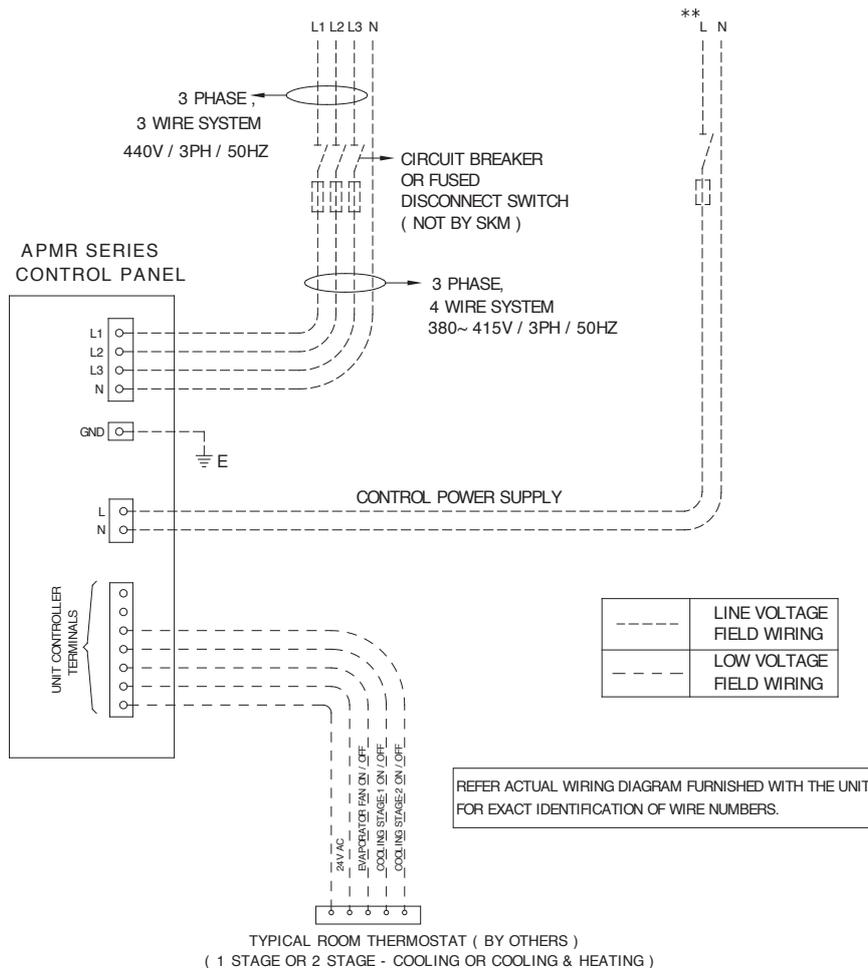

All field wiring must be done in accordance with applicable local and national codes.

For maximum recommended for fuse/circuit breaker sizing and minimum circuit amps for cable sizing, see Page 19~20 of this bulletin.

Duct work should be connected with flexible connections to the APMR series. One or two drains suitably trapped, are required to be connected to the drain outlet of all models of APMR series.

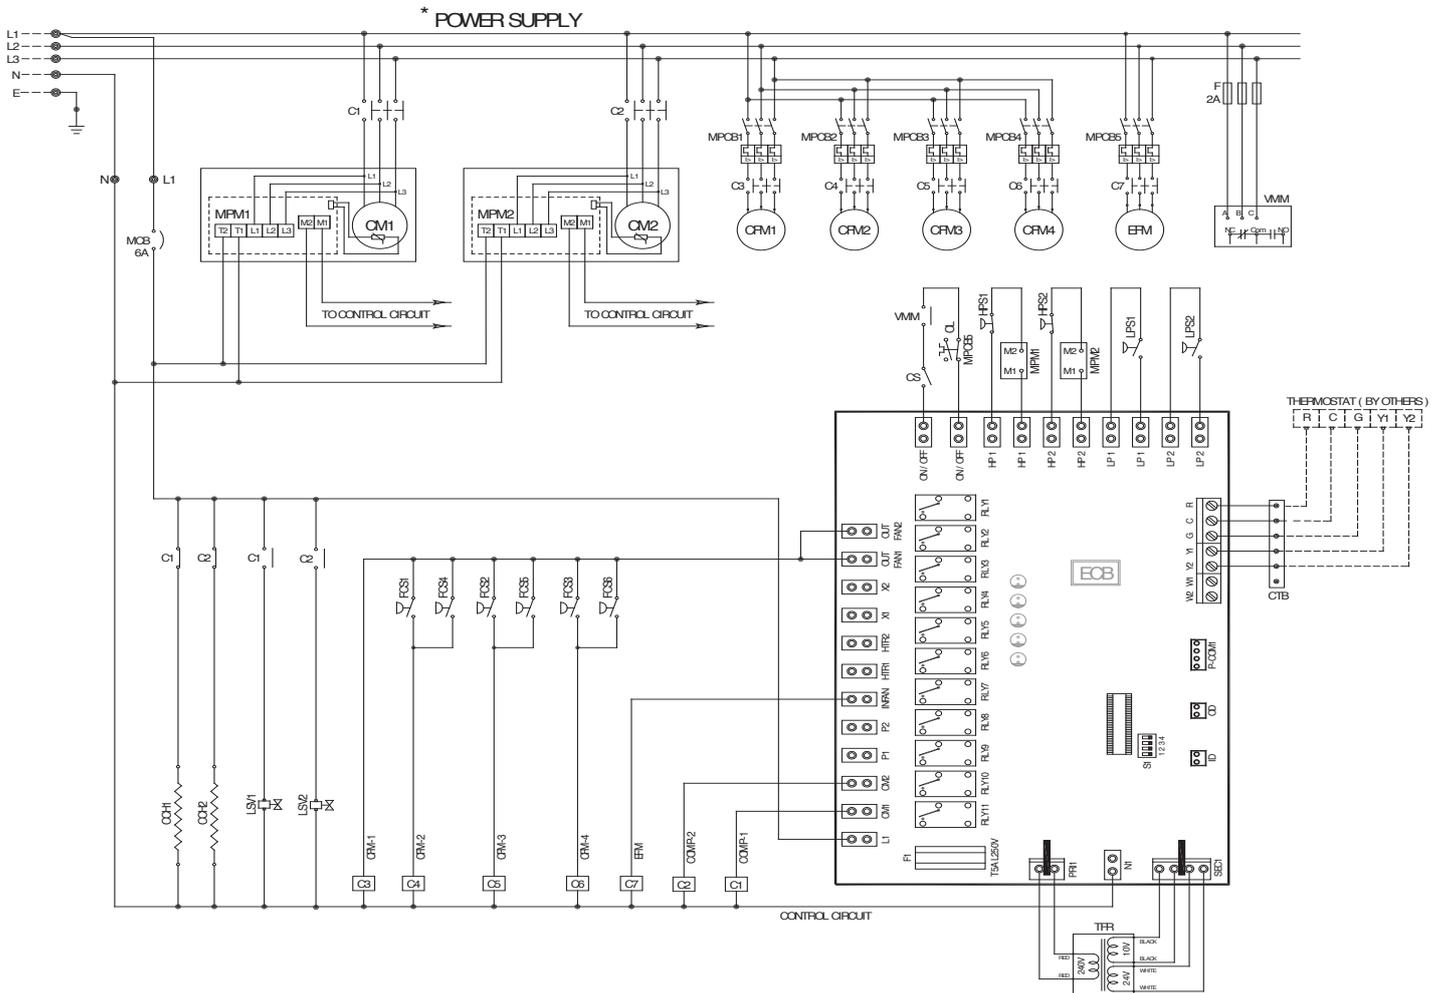

The APMR series is then ready to provide cooling, on demand.

## Field Wiring Requirement Schematic

\*\* APMR SERIES UNITS RATED FOR 440V / 3PH / 50HZ, OR POWER SUPPLIES WITHOUT NEUTRAL REQUIRE SEPARATE SOURCE OF CONTROL POWER SUPPLY THRU FIELD SUPPLIED AND INSTALLED 15A / 220V FUSED CONTROL DISCONNECT SWITCH OR ORDER WITH FACTORY BUILT OPTION CXT.

## Typical Wiring Diagram

LEGEND			
----	FIELD WIRING & FIELD SUPPLIED DEVICES	CS	CONTROL SWITCH
CM	COMPRESSOR MOTOR	THR	TRANSFORMER
CFM	CONDENSER FAN MOTOR	CTB	CONTROL TERMINAL BLOCK
EFM	EVAPORATOR FAN MOTOR	FCS	FAN CYCLING SWITCH
MPCB	MOTOR PROTECTOR CIRCUIT BREAKER	HPS	HIGH PRESSURE SWITCH
F	POWER CIRCUIT FUSE	LPS	LOW PRESSURE SWITCH
VMM	VOLTAGE MONITORING MODULE	ECB	ELECTRONIC CONTROL BOARD
OL	OVERLOAD RELAY	LSV	LIQUID LINE SOLENOID VALVE
C	CONTACTOR	MPM	MOTOR PROTECTOR MODULE
MCB	MINIATURE CIRCUIT BREAKER	COH	CRANK CASE HEATER

**NOTE**

- \* TYPICAL WIRING DIAGRAM SHOWN HERE IS ONLY FOR 380-415V/3PH/50Hz, 4 WIRE POWER SUPPLY.
- \* FOR 440V/3PH/50Hz AND POWER SUPPLIES WITHOUT NEUTRAL, "CXT" OPTION IS A MUST. WIRING DIAGRAMS ARE AVAILABLE ON REQUEST.

\*\* PROVIDE OVERCURRENT, EARTH FAULT PROTECTION, SHORT CIRCUIT AND DISCONNECT MEANS AS REQUIRED BY LOCAL & NATIONAL ELECTRIC CODE (BY OTHERS)

Table 10

### Legend

**MFA** Maximum Fuse Amps (for fuse/circuit breaker sizing), complies with NEC Article 440-22 & 430-52.  
**MCA** Minimum Circuit Amps.(for wire sizing), complies with NEC article 440-33.  
**ICF** Maximum Instantaneous Current Flow.

**RLA** Rated Load Amps. (at worst operating condition) .  
**LRA** Locked Rotor Amps.  
**FLA** Full Load Amps.

### Note :

Voltage imbalance not to exceed  $\pm 2\%$  of the rated voltage.

# GUIDE SPECIFICATIONS

## GENERAL FEATURES

Packaged air conditioners shall be composed of compressor(s), condenser coil(s), evaporator coil, expansion valve(s), connecting piping, all necessary liquid line accessories and safety controls.

Unit shall be factory assembled, internally wired, fully refrigerant charged with R-410A and thoroughly tested before delivery. Units should be capable to operate from 50°F (10°C) to 120°F (48.9°C) ambient temperature, and shall be rated in accordance with AHRI 210/240 and 340/360 standards.

## CONDENSER COIL(S)

Coil shall be air cooled with integral sub-cooling circuit, constructed of seamless copper tubes 3/8" OD mechanically bonded to Aluminium or Copper corrugated cross wave fins with maximum 14FPI (1.8mm) or 16FPI (1.6mm) spacing. Coil shall be tested against leakage by pressurizing air at 715psig (4930kPa) in coil, under water, cleaned and dehydrated at the factory.

## COMPRESSOR(S)

Compressor shall be hermetic scroll, refrigerant gas cooled furnished with internal overload protection device, crankcase heater, and shall be mounted on rubber isolators.

## CONDENSER FAN(S) & MOTOR(S)

The machine shall be furnished with direct driven propeller type discharging air upward condenser fans. Fans shall be constructed of corrosion resistant blades such as heavy gauge aluminum. The fan and drive shall be held in proper alignment. Fan assemblies shall be provided with heavy gauge, rust resistant steel wire fan guard. All condenser fans shall be individually, statically, and dynamically balanced for vibration free operation. Motors shall be Totally Enclosed Air Over (TEAO), 4 poles or 6 poles, class F insulation, with IP54 or IP55 protection and factory wired to unit control panel.

## EVAPORATOR COIL

Evaporator coil shall be constructed of seamless copper tubes 3/8" OD mechanically bonded to Aluminium or Copper corrugated cross wave fins with maximum 14 FPI (1.8mm) spacing.

Coil consists of headers of seamless copper tubing, thermostatic expansion valve(s) & multi-circuited distributor(s).

These coils shall be tested against leakage by air pressure of 450psig (3103kPa) under water, cleaned & dehydrated at the factory. Coil shall conform to AHRI-410.

## EVAPORATOR FAN & MOTOR

Fans of evaporators shall be forward curved, double inlet double width (DIDW), centrifugal type, statically & dynamically balanced, mounted on a single heavy duty shaft with permanently lubricated bearings and belt driven by V belt with an adjustable variable pitch motor pulley.

Motor shall be Totally Enclosed Fan Cooled (TEFC), 4 poles, class-F insulated, minimum IP55 protection & wired to unit control panel.

## REFRIGERANT PIPING

The refrigerant circuit piping shall be fabricated from ACR grade copper piping, with 1 & 2 refrigeration circuits, each liquid line shall include shut off valve, filter drier, sight glass, solenoid valve and thermostatic expansion valve.

Suction line shall be insulated with 1/2" (12mm) wall thickness enclosed cell pipe insulation with maximum K factor 0.28 Btu.in /ft<sup>2</sup> .h.°F. (0.040 W/mK).

## CASING

Unit casing shall be made of zinc coated galvanized steel sheets conforming to JIS-G3302 and ASTM A653 which shall be phosphatized and then electrostatically dry powder coated of approx. 60 microns to provide an extremely tough, scratch resistance, excellent anti-corrosive protection that can pass 1000 hrs in 5% salt spray testing at 95°F (35°C) and 95% relative humidity as per ASTM B117.

Evaporator section shall be sealed with vinyl gaskets and completely insulated faced with black glass tissue (BGT) heavy density, fire retardant, 32 Kg/m<sup>3</sup> density having Max. K factor 0.23 Btu.in /ft<sup>2</sup> .h.°F (0.033 W/mK) and permanent odorless fibre glass insulation of minimum 1" (25mm) thickness.

## FILTERS

Units shall be supplied with a range of filter sections with flat filter or vee filter 1" or 2" thick, with 54% or 72% dust arresance, respectively, in accordance with ASHRAE 52.2 if so specified.

A bag filter section to house 15", 21", or 30" deep bag filters having efficiency as desired shall be provided, if so specified.

High efficiency pleat filter shall be provided as an alternative to bag filter, if so specified.

For 100%, Fresh Air application, a sand trap louver shall be provided, if so specified.

## GUIDE SPECIFICATIONS

### CONTROL PANEL

Packaged units shall be provided with IP-54 control panel enclosure comprising all starting, operating and safety controls. The panel shall be factory wired in accordance with NEC 430 & 440, labeled, tagged and features 220V / 240V controls and shall include the following as a minimum.

- All compressors shall be with DOL starting.
- Individual compressor, condenser fan motors and evaporator fan motor contactors.
- Voltage monitoring module for protection against under voltage, over voltage, phase loss, phase reversal and phase unbalance of the incoming voltage.
- Motor protector circuit breaker for condenser and evaporator fan motors.
- Control circuit breaker.
- Control circuit on/off switch.
- Electronic control board for unit operation.
- Diagnostic LED's on the control board for easy troubleshooting.
- Power and control circuit terminal blocks.
- Compressor short cycling protection.
- High pressure protection.
- Low pressure protection.
